Darkspawn Implementation Guide

Gameplay features and illustrated catalogs

Current development implementation | October 13 2026

Darkspawn tree spirit emblem.

Darkspawn expands Minecraft with biome encounters, rideable creatures, cooking, equipment progression and shared exploration systems. This guide explains what players can currently use, where to find it, and how the systems work together.

This edition describes the development source for Minecraft 26.3 and Fabric, including the new mount habitats and five additional mounts. It includes changes made after the last packaged JAR. An older download may not contain every feature shown here.

The mod remains in alpha. Implemented features and playable prototypes are identified throughout. Planned ideas are listed separately at the end. Asset previews show the actual project models; they are not gameplay screenshots.

Starting and progression

Install matching Darkspawn versions on every client and the Fabric server, together with Fabric API and GeckoLib. The current source targets Minecraft 26.3, Fabric Loader 0.19.5, Fabric API 0.162.0+26.3 and GeckoLib 5.5.7. Restart after updating so dimension and biome registrations load.

Available before the Ender Dragon	Unlocked by the world dragon victory
Inventory sorting and upgrades; armor loadouts; storage networks; ordinary cooking, farming and Chef trades; armor styling; expedition gear and climate enchantments; all mount habitats; bonfires; shared OneBlock.	Boss rituals, natural regional creature populations, natural Endborn, regional atmosphere, and activation of Forsaken gates.
Druid Shrines, Hunter Camps and research bunkers can be explored before victory.	Boss rewards, legendary cores, premium ingredients and later progression become obtainable through the unlocked encounters.

Dragon progression is shared by the world. Permanent hearts, discoveries, inventory capacity and armor-loadout unlocks belong to individual players. Ordinary items and crafted equipment can be shared. Tamed mounts belong to their current owner; only that player can ride them.

Implemented scope

System	Current contents
Travel	14 rideable mount types with natural habitats; flight, gliding, grounded travel and swimming.
Encounters	16 boss families, 82 regional creatures and discoveries, Endborn, and 16 encounter-minion types.
Food	59 Cooking Station recipes: 50 prepared meals, six feasts and three staple recipes. Nine crop types including regional variants.
Equipment	15 standard armor styles, five legendary sets, five expedition families, 16 melee empowerments and ten shield, bow or armor powers.
Progression	Personal boss-heart upgrades, recipe discoveries, dietary variety, meal collection and advancements.
Building and storage	Sorting Tubes, Dump Chests, Sorting Chests, Bank Chests, a Barracks Bonfire and discovery landmarks.
Dimensions	Shared OneBlock progression and Forsaken city expeditions with infected threats and equipment rewards.

Optional builder supplies

The Dragon Starter Chest is a Creative or command-only equipment kit. It contains enchanted diamond gear, a bow, shield, food, building supplies and potions for the vanilla dragon fight. It has no Survival recipe or automatic world placement. Breaking the placed chest does not regenerate another kit.

The Testing Camp item builds a 21 by 21 supply camp on suitable clear, flat ground. It includes crafting and cooking, enchanting, crops, an inactive bonfire and labeled supplies. Placement refuses obstructions rather than partially overwriting a build. These helpers are optional; they are not normal progression rewards.

Mounts and natural habitats

Mount asset preview. Top row: Woolly Rhino, Flying Squirrel, Poptart Cat, Riding Dragon. Second row: Winged Unicorn, Riding Golem, Sasquatch, Cerberus. Third row: Jungle Leopard, Giant Seahorse, Giant Scorpion, Swamp Crocodile. Last row: Giant Mole.

Mounts are passive travel prototypes available before the dragon victory and in Peaceful. Feed the preferred item three times, at least two seconds apart, to tame a mount. Only the owner can ride, by empty-hand right-click; no saddle is required. Taming makes a wild mount persistent, and ownership survives saves and reconnects.

Control	Result
WASD and mouse	Move relative to the rider facing direction.
Space	Jump on land; rise on flying or swimming mounts.
X	Descend in flight, dive while swimming, or descend faster while gliding.
V plus movement	Dig a tunnel while riding a Giant Mole.
Shift	Dismount. A nearby safe floor is preferred; emergency midair exits grant Slow Falling.
Release movement	Flying mounts brake into a hover. Swimmers settle in water. The squirrel continues descending.

Movement boundaries

Leopards have a higher grounded jump and a larger safe-fall allowance; they cannot climb walls or fly. Seahorses and crocodiles can move up and down in water without drowning themselves. Their riders still need air, Water Breathing or appropriate diving equipment. The squirrel needs height to glide and cannot gain altitude. Ground mounts retain gravity and fall damage.

Flyers on Stay descend, except unclaimed sky cats, which hover. Follow steers toward the owner. Losing control packets stops active steering. Mounting and movement check rider headroom. Companion care and combat are described below.

Where mounts appear

Mount	Natural habitat	Travel
Griffin	Exposed jagged, frozen or stony peaks at Y128 or higher.	Flight and hover
Cerberus	Nether biomes below Y120 on dry supported ground.	Fast ground travel
Flying Squirrel	Surface forests and taigas.	Ground travel and downward gliding
Winged Unicorn	End island surfaces at Y30 or higher.	Flight and hover
Woolly Rhino	Snowy plains, ice spikes, snowy taiga, grove, snowy slopes, frozen or jagged peaks.	Ground travel
Riding Dragon	Covered Overworld caves below Y48, with lava within six blocks horizontally and three vertically.	Flight and hover
Riding Golem	Covered Overworld caves below Y48.	Slow ground travel
Sasquatch	Snowy taiga and grove surfaces.	Ground travel
Poptart Cat	Very rare open upper Overworld air, normally Y272-311.	Flight, hover and rear rainbow trail
Jungle Leopard	Jungle, sparse jungle and bamboo jungle surfaces.	Fast ground travel and a higher jump
Giant Seahorse	Ocean water with room for the full body and water above and below.	Controlled swimming; very slow on land
Giant Scorpion	Desert surfaces.	Ground travel
Swamp Crocodile	Swamp and mangrove swamp banks near water.	Ground travel and controlled swimming
Giant Mole	Super rare in Soul Sand Valley below Y120, on dry supported ground.	Ground travel and tunneling

Ordinary mounts use native biome spawning, population caps and single-animal groups. They require collision-free space. Land encounters require supported dry ground; cave mounts need overhead terrain at least eight blocks above the spawn level. A living mount of the same species within 96 blocks on each axis blocks a nearby duplicate. Unclaimed mounts may despawn with distance. These encounters can occur in existing terrain after updating; they do not require new chunks.

The sky cat keeps its separate very-rare rule: once per minute, one world-wide 1-in-20 roll is possible while a living non-spectator player is within 80 blocks of the Overworld ceiling. A successful roll tries one loaded position 32-64 blocks away horizontally. Blocked air, unloaded chunks or another cat within 128 blocks cancel the attempt. It can appear day or night. Twenty eligible minutes is the average time per successful roll, not a guaranteed spawn interval.

The Giant Mole has spawn weight 1 plus a 1-in-100 roll for each otherwise-valid placement. Hold V and move to clear a tunnel with space for the rider. It preserves the floor and drops normal diamond-tier mining loot without Fortune or Silk Touch. Up to 12 blocks are cleared per five ticks. Unbreakable blocks, fluids and containers are skipped; player build restrictions, spawn protection and Fabric block-break vetoes apply. Creative digging produces no drops. It cannot dig vertically or safely cross lava.

Taming and care

Trust messages and green particles show feeding progress; hearts confirm taming. Each successful Survival feeding consumes one item. Creative feeding does not consume items. The active feeder reserves the attempt for sixty seconds after each successful feeding. Other players cannot finish it during that time. Afterward, another feeder starts from zero; the original feeder retains saved progress until someone else starts.

Mount	Preferred bonding item
Griffin	Raw rabbit
Woolly Rhino	Wheat
Flying Squirrel	Sweet berries
Poptart Cat	Cookie
Riding Dragon	Cooked beef
Winged Unicorn	Golden apple
Riding Golem	Iron ingot
Sasquatch	Apple
Cerberus	Bone
Jungle Leopard	Raw chicken
Giant Seahorse	Kelp
Giant Scorpion	Spider eye
Swamp Crocodile	Raw cod
Giant Mole	Beetroot

Once tamed, only the owner can feed or ride. Each feeding heals four health points, or two hearts, with the same two-second cooldown. Full-health mounts, cooldown clicks and rejected attempts consume nothing. Iron ingots and bones act as bonding or repair items for the golem and Cerberus.

Existing ownerless mounts keep their identity, name, health and position but require normal taming. There is no free first-rider claim. Previously persistent mounts stay persistent; incomplete trust does not prevent a natural mount from despawning. Tamed sky cats settle on Stay. Owned mounts take normal damage but enter veterinary recovery when defeated.

Companion lifecycle

Companion commands and cargo

Sneak-right-click your companion empty-handed to open its panel within eight blocks. Follow approaches the owner within 32 blocks in the same dimension. Ground mounts navigate, flyers steer through open air and aquatic mounts swim. Seahorses stop chasing an owner on land. Following does not teleport, load chunks or dig, and terrain can block it. Stay stops following and cancels breeding readiness; flyers settle.

All fourteen species have nine cargo slots. Cargo survives saves, capsules, recovery and ownership transfer. Capsules, bundles, shulker boxes and items carrying container contents cannot go inside mount cargo.

Capsules and veterinary recovery

Use an empty Companion Capsule on your owned, unoccupied, unleashed mount to store its identity, name, health and cargo. Use the filled capsule on safe ground to release in Stay mode. Seahorses require water around their full body. Ridden mounts, breeding requests and pending transfers block capture. Ordinary lost capsules must be recovered; veterinary reissue is limited to defeated companions.

Lethal damage to an owned mount creates a recovery token. Carry a Veterinary Kit and use the token on a safe surface to restore full health, consuming one kit on success. Use a kit directly on an injured companion to heal it fully. Use a kit in air to reclaim one missing recovery token; joining also returns one. Offline recoveries remain saved. Copied tokens cannot redeem a companion twice. OneBlock companions and cargo cannot cross into normal worlds through capsules, or vice versa.

Breeding and ownership transfer

Set two healthy adults of the same species and owner to Stay near each other. Choose Breed for each, spending one preferred item from inventory per parent. Readiness lasts thirty seconds. A successful pairing creates one owned baby and starts a five-minute cooldown for both parents. Babies grow after twenty minutes of loaded entity ticks and cannot be ridden before then. Growth pauses while stored. Saves retain growth and cooldowns but cancel incomplete breeding requests.

Select a living nearby player and choose Offer transfer. That recipient must sneak-right-click the mount empty-handed and accept within sixty seconds while both players remain within eight blocks. The offer includes cargo. Pending offers block riding, storage and breeding. Cancel or reload clears the offer. Acceptance revokes the old owner immediately and selects Stay.

Crafting table item	Ingredients and arrangement
Companion Capsule	Top: iron in center. Middle: amethyst shard, ender pearl, amethyst shard. Bottom: iron in center.
Veterinary Kit	Top: white wool in center. Middle: apple, gold ingot, apple. Bottom: iron in center.

Mount combat abilities

Hold Mount: Ability, G by default and rebindable in Controls, to attack whenever the cooldown permits. Rhino charge also requires forward movement on dry ground. The owning rider controls each activation; mounts do not attack autonomously. An on-screen message shows the cooldown after use.

Mount	Ability	Cooldown
Riding Dragon	Aimed eight-block cone deals 8 fire damage and three seconds of burning. Fire-immune enemies retain their immunity.	4 seconds
Woolly Rhino	Up to one second of faster ground travel; contact deals 10 damage and knockback, once per enemy per charge. Actual movement is required.	5 seconds
Giant Scorpion	Nearest hostile in a forward cone within 3.5 blocks takes 4 damage and Poison I for five seconds. Poison immunity still applies.	3 seconds
Swamp Crocodile	Nearest hostile in a forward cone within 3.5 blocks takes 8 damage and Slowness I for two seconds, on land or underwater.	2 seconds
Cerberus	The mount and mounted owner are immune to fire and lava damage. Rider protection ends immediately on dismount.	Passive

Damage is measured in health points before armor and resistance; two points equal one heart. Attacks spare players, owned companions, allies and peaceful regional wildlife. Neutral vanilla enemies must already be targeting the rider or mount. Walls block attacks, and dragon breath never ignites or destroys terrain.

Misses still consume the cooldown. Cooldowns survive remounting and saving; active charges do not resume after loading. Releasing forward, stale controls, dismounting, leaving the ground, water or a wall ends a rhino charge. Server-synchronized jaw, head, wing, tail and claw poses accompany the existing sounds and particles. Attacks blend back into movement; cancellation and reloading clear active poses.

Cerberus protection leaves existing potion effects untouched. It grants neither lava walking nor protection against other damage. A dismounted rider is vulnerable immediately, so dismount onto safe ground.

Boss encounters

All 16 boss families have summon rituals, models, animations, phased encounters and rewards. Bosses are summoned by players; the surrounding ecosystem creatures do not automatically start a boss fight. Every ritual needs the world dragon victory, the correct habitat, non-Peaceful difficulty and enough clear space. A nearby living boss of the same family prevents a duplicate. Failed rituals preserve the summon item.

Boss health increases by half the solo value for each additional nearby Survival player, up to four players, and is fixed at summon time. Phases advance at 70% and 35% health and do not reverse through healing. Attacks use visible warnings and recovery windows. Most attack effects preserve player terrain.

Boss	Solo HP	Ritual location
Ancient Tree Spirit	800	Moss block in a supported forest clearing.
Giant Mutated Wolf	900	Bone block in a supported taiga at night.
Giant Mutant Zombie	1,000	Hay bale in plains or meadows
Fossil Tyrant	1,200	Bone block in desert or badlands
Thunder Bird	1,100	Unoxidized copper block in savanna during a thunderstorm
Titan Boa	1,100	Moss block in jungle
Baba Yaga	1,200	Empty cauldron in swamp at night
Mountain Titan	1,500	Chiseled stone bricks in mountains
Ice Wyrm	1,300	Blue ice in frozen lands
Kraken	1,500	Cast into open ocean water at least seven blocks deep
Giant Cave Crawler	1,100	Cobweb in cave biomes, or ordinary caves below Y48; excludes Deep Dark
Shadow Creeper Queen	2,400	Sculk in a large Deep Dark cavern
Mycelial Sovereign	1,400	Mycelium in mushroom fields
Netherborn	1,500	Magma in crimson/warped forests, Nether wastes, or basalt deltas
Soulbound Colossus	1,700	Soul sand in a Soul Sand Valley
Void Eye	1,800	Obsidian on an outer End island

Summoning and arena preparation

Most sigils use four outer materials, four inner materials and dragon's breath. The Cookbook is for food; boss item tooltips and the crafting recipe book explain the summon ingredients. Regional discovery materials offer an alternative summon recipe. Void Eye uses the Watcher Lens, which includes Endborn Shards. Kraken uses Abyssal Bait cast into deep open ocean water.

The Tree Spirit requires a 21 by 21 clearing and 28 blocks of height. It awakens as a towering rooted tree, then sheds canopy sections as phases advance. Destroy healing saplings and use the exposed heartwood recovery window. The wolf uses chase pressure, warned pounces, howls and temporary pack support.

Distinct encounter mechanics

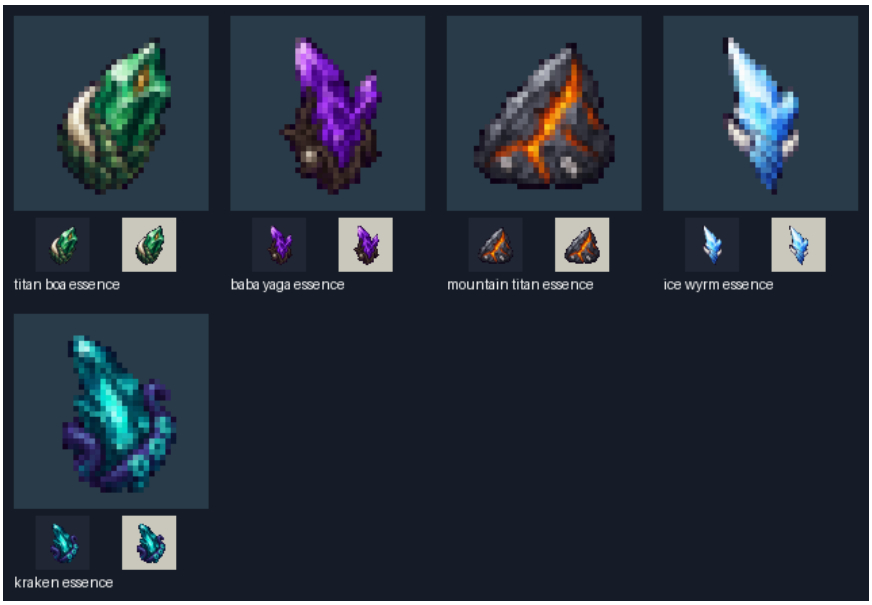

Boss	Phase one	Phase two	Phase three
Zombie	Slams and thrown debris	Summoned mutant horde	Charges and aerial follow-up volleys
Fossil Tyrant	Bites, sweeps, bone volleys	Charges and destructible bone guardians	Eruptions and aggressive charge/bite rotation
Thunder Bird	Marked lightning and volleys	Wind blasts and living storm turrets	Multiple lightning columns and more turrets
Titan Boa	Bites and venom	Constriction zones and offspring	Charges between constrictions
Baba Yaga	Hex volleys from a walking chicken-legged hut	Poison miasma, healing nodes, hunters	Teleports between hex/miasma attacks
Mountain Titan	Slams and rocks	Eruptions and broad sweeps	Lines of delayed ground fractures
Ice Wyrm	Frost volleys and bites	Burrowing strikes and blizzards	Burrows leave lingering frost zones
Kraken	Four destructible tentacles, waves, ink	Two more tentacles and whirlpools	Two final tentacles and water-jet beams
Cave Crawler	Web volleys and bites	Hatchable eggs, web zones, pounces	Poison volleys mixed with pounces
Shadow Creeper Queen	Armor-breaking acid, sweeps, darkness	Royal guardians, acid pools, eggs	Shadow storms, charges, turret support
Mycelial Sovereign	Mushroom stands up, then spores and root marks	Healing mushrooms and fungal turrets	More turrets, fungal patches, eruptions
Netherborn	Regional charge or teleport plus fire/hex volleys	Magma cracks or warped constriction, regional minions	Stronger regional rotation; warped teleports leave tendrils at both ends
Soulbound Colossus	Soul volleys and heart-stealing strikes	Soul turrets and beams	Beams overlap persistent soul storms
Void Eye	Beams, volleys, four rotating shields	Endermites/Endborn and platform displacement	Void rifts, platforms, and only two shield shards

Bone guardians, royal guardians and Kraken tentacles protect their owners with damage reduction. Destroy these supports to reopen damage opportunities. Healing nodes and turrets have limited lives and their own warnings. Encounter waves have finite budgets and do not farm unlimited rewards.

Soulbound Colossus temporarily steals maximum-health hearts; defeating soul cages, waiting out the effect or ending the encounter returns them. Permanent heart progress is never deleted. Void Eye displacement checks for safe supported destinations and grants Slow Falling instead of deliberately dropping players into the void.

Encounters expire without rewards when living Survival players remain away for the timeout. Boss state, phase and participants survive saves. Reloaded attacks receive a new warning rather than silently completing. Solo and multiplayer balance remain alpha values.

Boss rewards and equipment powers

Boss essence artwork preview. Essences are separate from permanent-health hearts and cooking ingredients.

Permanent hearts and repeat rewards

Right-click a boss heart to absorb its family identity. The first ten distinct hearts each add one normal heart, bringing the normal total to twenty. Identities eleven through fifteen add five golden absorption hearts of capacity. Duplicates are rejected without consumption. There are sixteen families, so players can choose which fifteen finish the track.

Golden capacity refills after sixty seconds without damage. Joining, respawning or taking damage restarts the delay, and stronger golden-apple absorption is preserved. Heart progress survives death, reconnects and server restarts. Normal added hearts heal through normal regeneration.

Nearby qualifying contributors receive individually reserved progression rewards. Each boss also has a separate premium culinary ingredient and decorative trophy, obtainable on repeat wins. The smithing essence is a shared kill drop. Helpers and abandoned encounters do not grant these rewards.

Melee empowerments

Smith an amethyst shard, a melee weapon and the listed boss material. The item keeps its identity, damage, name, enchantments and unrelated components. It holds one empowerment: a different power replaces the previous one, while reapplying the same power is rejected. Powers trigger on successful direct melee hits.

Boss drop	Weapon power
Living Heartwood	Rootbound: direct melee hits inflict Slowness III for two seconds
Alpha Fang	Predator's Rush: direct melee hits grant the attacker Speed II for four seconds
Mutant Marrow	Undying Fury: Melee hits grant Strength I for 3 seconds.
Tyrant Tooth	Armor Rend: Melee hits reduce enemy armor by 4 for 5 seconds.
Thunder Quill	Stormchain: Melee hits arc 4 magic damage to up to 3 nearby monsters. 2-second cooldown.
Venom Heart	Venomfang: Melee hits inflict Poison II for 4 seconds.

Boss drop	Weapon power
Hexbound Eye	Hexweaver: Melee hits inflict Weakness II for 5 seconds.
Titan Core	Stoneguard: Melee hits grant Resistance I for 4 seconds.
Glacial Fang	Winterbite: Melee hits inflict Slowness IV for 3 seconds.
Kraken Pearl	Tidecaller: Melee hits grant Water Breathing and Dolphin's Grace for 8 seconds.
Silken Fang	Broodmark: Melee hits mark enemies with Glowing for 10 seconds and Poison I for 4 seconds.
Royal Shadow Gland	Shadowbane: Melee hits inflict Wither II for 4 seconds and grant Night Vision for 30 seconds.
Sovereign Spore	Mycelial Mending: Melee hits grant Regeneration I for 4 seconds.
Netherborn Organ	Netherflame: Melee hits ignite enemies for 4 seconds and grant Fire Resistance for 5 seconds.
Freed Soul	Soul Siphon: Melee hits restore 1 heart and release 1 stolen soul-heart. 4-second cooldown.
Void Iris	Voidstep: Melee hits grant Speed III for 2 seconds and Slow Falling for 5 seconds.

Shield bow and armor powers

Equipment	Material	Power
Shield	Living Heartwood	Successful blocks slow the attacker for two seconds
Shield	Mountain Titan Essence	+50% knockback resistance while raised
Bow	Thunder Bird Essence	Successful arrows slow the target and arc three magic damage to one nearby hostile mob; no terrain ignition
Bow	Void Eye Essence	Successful arrows reveal targets for five seconds and slow them for three
Armor	Ice Wyrm Essence	Freeze protection while worn
Armor	Kraken Essence	+35% water movement efficiency while worn
Armor	Shadow Creeper Queen Essence	Clears Darkness while worn
Shield	Ice Wyrm essence	Frostguard weakens an attacker for three seconds after a successful block.
Bow	Titan Boa essence	Venomshot applies Poison I for three seconds.
Armor	Mountain Titan essence	Highland reduces the fall-damage multiplier by 0.25 once, regardless of matching piece count.

The same amethyst-shard smithing pattern applies. Matching armor powers do not stack by piece count, but different powers can coexist. Only worn equipment supplies armor benefits. Arrows retain the power of the bow used at launch even when the held item changes.

Regional creatures

Ecosystems unlock after the first world dragon victory. They use native population caps and habitat-specific surface, underground, lighting or water checks. Hostiles do not naturally appear in Peaceful. Existing terrain can gain populations without regeneration. The mount habitats are independent of this progression gate.

Forests

Creature / entity ID	Behavior and rewards
Barkling / barkling	Neutral walking sapling with 16 HP. Freezes near unprovoked players and retaliates with thrown sticks. Use shears to harvest one Wild Herbs; costs one durability and regrows after five minutes of world time.
Hollowed / hollowed	Slow armored wooden humanoid with 36 HP. Melee hits apply Slowness III for two seconds. Player kills drop one Wild Herbs.
Rootcrawler / rootcrawler	Low tangled roots with 24 HP. Marks a fixed spot for 1.25 seconds, then strikes within 1.5 blocks. Player kills drop one Wild Herbs.
Ancient Ent / ancient_ent	Rare 100 HP herald with a wider three-block root strike. Player kills drop Wild Herbs and Ancient Heartwood, providing another route to summon the Tree Spirit.

Wooden creatures take extra damage from axes and fire. Barkling herb shearing is renewable, with a five-minute regrowth timer saved on the creature. Harvesting a calm Barkling does not anger it. The Ancient Ent provides an alternate Tree Spirit summon, not a boss heart.

Taigas

Creature / entity ID	Behavior and player-kill drops
Dire Wolf / dire_wolf	28 HP pack predator; drops one bone.
Frostfang / frostfang	30 HP; walks on powder snow, successful bites inflict Slowness I for three seconds; drops one bone.
Ravaged Wolf / ravaged_wolf	44 HP with enlarged, uneven forelimbs; at or below 35% health while targeting prey, frenzies for five seconds with +35% movement speed and +2 attack damage. Fifteen-second trigger cooldown; drops one rabbit hide.
Alpha Dire Wolf / alpha_dire_wolf	Rare 90 HP herald; howls to boost its pack and marks a landing before a short pounce. Drops one bone and the existing Moonlit Fang boss summon.

Wolf packs hunt players and suitable prey. Pack speed bonuses do not multiply with every wolf. An Alpha has a bounded helper call and a warned pounce; called wolves expire and have no loot or XP. Alpha Fang remains a boss-only reward, while Alpha Dire Wolf grants the Moonlit Fang summon.

The following catalog describes every additional registered regional creature. Health is measured in points; two points equal one heart. Ordinary death drops listed here require a player kill and normal mob loot rules. Summoned helpers provide no ordinary loot. Rare heralds supply discovery materials, not boss hearts.

Plains and meadows

Rotted Zombie, Brute Zombie, Leaping Zombie, Mutant Huskling, Failed Mutant. Tougher undead, warned slams/pounces, thrown debris; the Brute opens and closes wooden doors without breaking them. Failed Mutant drops Mutated Flesh.

Creature and entity ID	Health behavior and rewards
Rotted Zombie rotted_zombie	36 HP; hostile. Armored melee undead. Drops rotten flesh.
Brute Zombie brute_zombie	48 HP; hostile. Warns before a ground smash. Opens and closes wooden doors without breaking them. Drops rotten flesh.
Leaping Zombie leaping_zombie	20 HP; hostile. Fast undead with a warned pounce. Drops rotten flesh.
Mutant Huskling mutant_huskling	50 HP; hostile. Throws debris at range. Drops rotten flesh.
Failed Mutant failed_mutant	100 HP; hostile. Rare herald with a warned smash. Drops Mutated Flesh.

Desert and badlands

Bone Raptor, Fossil Scorpion, Bone Vulture, Fossilized Husk, Tyrant Skull. Raptor packs pounce; scorpions poison; vultures scavenge loose bones and attack weakened players. Right-click a Tyrant Skull with a pickaxe to excavate one Ancient Tyrant Fossil, costing one durability.

Creature and entity ID	Health behavior and rewards
Bone Raptor bone_raptor	24 HP; hostile. Pack-spawning predator with a warned pounce. Drops a bone.
Fossil Scorpion fossil_scorpion	30 HP; hostile. Hides while idle; bites apply three seconds of poison. Drops a bone.
Bone Vulture bone_vulture	20 HP; hostile. Flies, collects loose bones, and attacks players at half health or lower. Returns its carried item on death; ordinary drop is a bone.
Fossilized Husk fossilized_husk	40 HP; hostile. Slow, heavily armored melee undead. Drops a bone.
Tyrant Skull tyrant_skull	20 HP; passive. Stationary discovery on sand or terracotta. Right-click with a pickaxe for one Ancient Tyrant Fossil, costing one durability. Ordinary attacks cannot excavate it.

Savanna

Storm Finch, Shocktalon, Stormstrider, Thunder Roc. Peaceful charged finches, neutral fast striders, warned diving birds, lightning projectiles and wing knockback. Roc drops Charged Feather; use it on exposed, unwaxed fresh copper during thunder to obtain Stormforged Feather.

Creature and entity ID	Health behavior and rewards
Storm Finch storm_finch	8 HP; passive. Small passive flier with visible static during thunderstorms. Drops a feather.

Creature and entity ID	Health behavior and rewards
Shocktalon shocktalon	26 HP; hostile. Warned diving attack briefly slows its victim. Drops a feather.
Stormstrider stormstrider	32 HP; neutral. Fast neutral ground creature with visible static during thunderstorms. Drops a feather.
Thunder Roc thunder_roc	90 HP; hostile. Rare flying herald fires lightning projectiles and knocks nearby targets back with wing pulses. Drops Charged Feather.

Jungle

Tree Viper, Constrictor, Jungle Stalker, Brood Serpent. Climbing venomous vipers, fixed warned constriction zones, camouflaged ambush predators. Brood Serpent drops Titan Scale.

Creature and entity ID	Health behavior and rewards
Tree Viper tree_viper	16 HP; hostile. Climbs walls, hides while idle, and applies three seconds of poison on a bite. Drops a vine.
Constrictor constrictor	32 HP; hostile. Warns before attacking a fixed constriction area and strongly slowing victims. Drops a vine.
Jungle Stalker jungle_stalker	30 HP; hostile. Hides until prey is close. Its cooldown-limited ambush hit deals extra damage and applies weakness. Drops a vine.
Brood Serpent brood_serpent	100 HP; hostile. Rare large serpent with a warned constriction attack. Drops Titan Scale.

Swamp

Bogling, Hexed Frog, Swamp Wisp, Hexbound, Baba's Familiar. Loose-food scavenging, short curses, weak hex projectiles, and guided particle trails. Follow a Familiar to its marked destination for a Witch Token; killing it grants no token. Wisps reward followers with glow berries.

Creature and entity ID	Health behavior and rewards
Bogling bogling	16 HP; hostile. Breathes underwater and scavenges loose food, spider eyes, or sugar; retreats with its item. Returns carried property on death. Ordinary drop is a spider eye.
Hexed Frog hexed_frog	14 HP; hostile. Melee hits apply either weakness or slowness for three seconds. Drops a spider eye.
Swamp Wisp swamp_wisp	10 HP; passive. Passive flying guide. Follow its particle-marked route to earn glow berries once. Ordinary player-kill drop is a spider eye.
Hexbound hexbound	28 HP; hostile. Uses warned ranged hex projectiles. Drops a spider eye.
Baba's Familiar babas_familiar	30 HP; passive. Rare passive guide. Follow it to its marked destination for one Witch Token; killing it gives no token.

Mountains

Stoneback Goat, Crag Crawler, Stoneborn, Titan Spawn. Neutral armored charging goats resist projectiles; crawlers ambush; rock creatures throw debris and the Titan Spawn also slams at close range. Titan Spawn drops Titan Stone.

Creature and entity ID	Health behavior and rewards
Stoneback Goat stoneback_goat	36 HP; neutral. Neutral armored charger. Takes half damage from projectiles before other defenses. Drops flint.
Crag Crawler crag_crawler	26 HP; hostile. Hides until prey approaches, then uses a stronger ambush bite with weakness on a cooldown. Drops flint.
Stoneborn stoneborn	48 HP; hostile. Slow armored rock creature that throws debris. Drops flint.
Titan Spawn titan_spawn	120 HP; hostile. Rare heavily armored herald throws debris and slams at close range. Drops Titan Stone.

Frozen lands

Frostling, Frozen Husk, Icefang, Young Wyrm. Ice projectiles, slowing bites, armored husks vulnerable to fire, and a Wyrm that retreats at low health. All four walk on powder snow and resist freezing. Young Wyrm drops Wyrm Scale.

Creature and entity ID	Health behavior and rewards
Frostling frostling	16 HP; hostile. Hides while idle and fires frost projectiles. Drops a snowball.
Frozen Husk frozen_husk	40 HP; hostile. Armored melee undead with slowing hits. Fire deals double damage and briefly activates its thaw state. Drops a snowball.
Icefang icefang	26 HP; hostile. Pack-spawning predator whose bites apply three seconds of slowness. Drops a snowball.
Young Wyrm young_wyrm	90 HP; hostile. Rare herald uses ranged frost attacks and retreats below one-quarter health. Drops Wyrm Scale.

Oceans

Abyssal Fish, Giant Crab, Siren, Leviathan Spawn. Actual swimming/breathing, seabed crabs with a vulnerable rear, warned Siren pulls, and serpent grabs that also damage nearby boats before retreating deeper. Leviathan Spawn drops Abyssal Scale for the existing Kraken family.

Creature and entity ID	Health behavior and rewards
Abyssal Fish abyssal_fish	20 HP; hostile. Hostile swimmer with melee bites; natural spawning requires dark water. Drops a prismarine shard.
Giant Crab giant_crab	40 HP; neutral. Neutral armored seabed creature with a warned smash. Attacks from behind deal double damage before other defenses. Drops a prismarine shard.
Siren siren	32 HP; hostile. Warns before an attack that pulls victims toward it. Drops a prismarine shard.
Leviathan Spawn leviathan_spawn	110 HP; hostile. Rare deep-water herald with a warned grab, nearby boat damage, and a retreat into deeper water. Drops Abyssal Scale.

Caves

Cave Skitterer, Web Spitter, Brood Carrier, Tunnel Widow. Wall climbing, temporary web effects, finite hatchlings, and a warned Widow pounce with climbing retreat. Widow drops Brood Fang. Also found below Y=48 in covered Overworld terrain outside the Deep Dark.

Creature and entity ID	Health behavior and rewards
Cave Skitterer cave_skitterer	10 HP; hostile. Small wall-climbing melee creature that can spawn in groups. Drops string.
Web Spitter web_spitter	24 HP; hostile. Climbs and fires web projectiles, leaving temporary slowing patches without replacing blocks. Drops string.
Brood Carrier brood_carrier	38 HP; hostile. Armored climber releases a bounded group of temporary skitterer helpers on death. Drops string; helpers have no loot.
Tunnel Widow tunnel_widow	90 HP; hostile. Rare climber with a warned slowing pounce and a climbing retreat below half health. Drops Brood Fang.

Deep Dark

Shadow Drone, Shadow Stalker, Shadow Spitter, Shadow Guardian, Shadow Larva, Shadow Egg, Shadow Praetorian. Darkness bursts, hunters that freeze under observation, acid/dark patches, nest-area guards, finite egg hatching, natural larva maturation, and directional herald strikes. Praetorian drops Shadow Membrane, leaving Royal Shadow Gland boss-exclusive.

Creature and entity ID	Health behavior and rewards
Shadow Drone shadow_drone	24 HP; hostile. Warned close-range burst applies darkness and consumes the drone. Defeat it before the burst for a sculk vein.
Shadow Stalker shadow_stalker	28 HP; hostile. Stops moving when its target looks at it, then resumes stalking when unobserved. Drops a sculk vein.
Shadow Spitter shadow_spitter	28 HP; hostile. Fires acid projectiles and leaves temporary darkness patches. Drops a sculk vein.
Shadow Guardian shadow_guardian	60 HP; hostile. Armored guardian maintains a local home area and attacks with a warned shockwave. Drops a sculk vein.
Shadow Larva shadow_larva	8 HP; hostile. Natural larvae can mature into Shadow Drones after about one minute; temporary helpers cannot mature. Drops a sculk vein.
Shadow Egg shadow_egg	10 HP; neutral. Stationary neutral egg alerts nearby regional allies when hurt and releases bounded temporary larvae on death. Drops a sculk vein.
Shadow Praetorian shadow_praetorian	140 HP; hostile. Rare armored herald uses warned directional strikes and darkness. Drops Shadow Membrane; Royal Shadow Gland remains boss-only.

Mushroom fields

Sporeling, Mycelium Crawler, Infected Mooshroom, Sporewalker, Mycelial Guardian. Neutral hive retaliation, fungal ambushes, reactive spores, and a Guardian that heals on mycelium and creates temporary spore patches. Guardian drops Mycelial Heart Fragment.

Creature and entity ID	Health behavior and rewards
Sporeling sporeling	12 HP; neutral. Neutral hive creature alerts allies when attacked and grants nearby regional allies brief speed during combat. Drops a brown mushroom.
Mycelium Crawler mycelium_crawler	26 HP; hostile. Hides until prey is close, then uses a stronger ambush bite with weakness on a cooldown. Drops a brown mushroom.
Infected Mooshroom infected_mooshroom	40 HP; hostile. Fires spores and poisons nearby attackers with a cooldown-limited defensive spore response. Drops a brown mushroom.
Sporewalker sporewalker	30 HP; hostile. Ranged spore attacker. Drops a brown mushroom.
Mycelial Guardian mycelial_guardian	110 HP; neutral. Rare neutral herald heals one health every two seconds on mycelium and creates temporary spore patches in combat. Drops Mycelial Heart Fragment.

Nether regions

Crimson: Crimson Ravager, Fungal Imp, Bloodroot, Crimson Spawn. Warped: Warped Stalker, Warped Wisp, Riftling, Warped Spawn. Wastes/deltas: Ash Ghoul, Magma Brute, Infernal Hoglin, Infernal Spawn. Charges, allied speed buffs, stationary snares, stare-triggered hostility, safe blinks, and temporary magma effects. The three Spawn heralds drop Crimson / Warped / Infernal Organ respectively.

Creature and entity ID	Health behavior and rewards
Crimson Ravager crimson_ravager	50 HP; hostile. Crimson Forest charger with a warned attack. Drops crimson fungus.
Fungal Imp fungal_imp	18 HP; hostile. Crimson Forest melee creature grants nearby regional allies brief speed during combat. Drops crimson fungus.
Bloodroot bloodroot	32 HP; hostile. Stationary Crimson Forest predator uses warned close-range snares. Drops crimson fungus.
Warped Stalker warped_stalker	40 HP; neutral. Warped Forest creature becomes hostile when stared at and can blink during combat. Drops warped fungus.
Warped Wisp warped_wisp	22 HP; hostile. Warped Forest flying spore attacker with short combat blinks. Drops warped fungus.
Riftling riftling	14 HP; neutral. Neutral Warped Forest flier with short combat blinks. Drops warped fungus.
Ash Ghoul ash_ghoul	28 HP; hostile. Nether Wastes and Basalt Deltas melee creature ignites targets for two seconds. Drops magma cream.
Magma Brute magma_brute	60 HP; hostile. Armored Wastes and Deltas creature uses warned fiery attacks and temporary magma patches. Drops magma cream.
Infernal Hoglin infernal_hoglin	44 HP; hostile. Wastes and Deltas charger with a warned attack. Drops magma cream.

Creature and entity ID	Health behavior and rewards
Crimson Spawn crimson_spawn	120 HP; hostile. Rare Crimson Forest herald with a warned charge. Drops Crimson Organ.
Warped Spawn warped_spawn	110 HP; hostile. Rare Warped Forest herald uses spore projectiles and short combat blinks. Drops Warped Organ.
Infernal Spawn infernal_spawn	130 HP; hostile. Rare Wastes and Deltas herald uses fiery attacks and temporary magma patches. Drops Infernal Organ.

Soul Sand Valley

Lost Soul, Bonewalker, Soulflame Skull, Tormented, Soul Keeper. Brief ghost movement, one saved reconstruction, soul bolts, stationary snares, and limited helpers. Lost Souls temporarily reduce maximum health by half a heart; Keeper bolts by one heart. Keeper drops Captured Soul.

Creature and entity ID	Health behavior and rewards
Lost Soul lost_soul	12 HP; hostile. Flying spirit briefly passes obstacles during pursuit. Contact attacks temporarily reduce maximum health by half a heart. Drops a bone.
Bonewalker bonewalker	28 HP; hostile. Melee undead reconstructs once at half health after ordinary lethal damage. That used revival persists across reloads. Drops a bone on final defeat.
Soulflame Skull soulflame_skull	22 HP; hostile. Flying ranged soul-bolt attacker. Drops a bone.
Tormented tormented	28 HP; hostile. Stationary predator uses warned close-range snares. Drops a bone.
Soul Keeper soul_keeper	110 HP; hostile. Rare herald fires soul bolts that temporarily reduce maximum health by one heart and calls bounded Lost Soul helpers. Drops Captured Soul.

Outer End islands

Voidling, End Grazer, Shardling, Void Ray, Watcher, Void Sentinel. Safe short blinks, passive chorus grazing, arrow dodges, neutral flying rays, retreating observers, and a shielded herald with finite Voidling helpers. Sentinel drops Watcher Fragment for the existing Watcher Lens summon.

Creature and entity ID	Health behavior and rewards
Voidling voidling	12 HP; hostile. Small hostile flier with short combat blinks; natural groups can contain several creatures. Drops chorus fruit.
End Grazer end_grazer	26 HP; passive. Passive creature heals near chorus without consuming the plants and blinks away when injured. Drops chorus fruit.
Shardling shardling	28 HP; neutral. Neutral flier can blink to dodge a projectile when its cooldown is ready. Drops chorus fruit.
Void Ray void_ray	40 HP; neutral. Large neutral flying melee creature. Drops chorus fruit.
Watcher watcher	26 HP; hostile. Flying ranged observer retreats when prey is close. Drops chorus fruit.

Creature and entity ID	Health behavior and rewards
Void Sentinel void_sentinel	110 HP; hostile. Rare herald uses void projectiles, combat blinks, rotating defensive fragments, and bounded Voidling helpers. Strike between its shield fragments. Drops Watcher Fragment.

Discoveries and population limits

Regional discovery materials combine with dragon's breath to produce their existing boss summons. Thunder Bird needs a Stormforged Feather; Netherborn needs all three regional organs. Discoveries do not award boss hearts or replace ritual weather, space and biome requirements.

Special attacks warn before executing at fixed locations. Temporary web, darkness, magma and spore areas do not replace player blocks. Helper producers have bounded lifetime calls, local caps, no helper loot and short expiration. Natural Shadow Larvae can mature once; summoned helpers cannot reproduce. Teleports require loaded, collision-free, supported destinations.

Endborn

Endborn are separate hostile End creatures with 60 health, melee attacks, teleports and a projectile-dodge cooldown. They naturally appear after the dragon victory in End highlands, midlands and barrens. Player-killed natural Endborn drop a shard and pearl. Void Eye helpers do not provide these drops. Endborn Shards help craft the Watcher Lens.

Cooking and agriculture

The Cooking Station combines one to four ingredient types in any order. It previews the result before taking ingredients, works instantly, and needs no fuel. Taking an output consumes one of each listed ingredient; bulk crafting stops when output space runs out. Buckets and bottles return appropriately. Inputs belong to the open player menu and return when it closes; the station does not store shared ingredients.

Craft the station from four iron ingots, a campfire and three planks. Meals stack to sixteen and can be eaten at full hunger. Only one meal buff is active: another meal replaces it. Ordinary foods and cheese do not replace the buff, and independently applied potions keep their own timers. Meal timers save, pause offline, and clear on death or milk.

Crops and ingredients

Ingredient	Raw hunger / saturation	Acquisition	Example dish uses
Onion	2 / 1.2	Onion crop	Hunter's Stew, Bog Gumbo, Vegetable Pizza
Garlic	1 / 0.6	Garlic crop	Garlic Bread, Winter Hotpot, Mushroom Risotto
Tomato	3 / 1.8	Tomato crop	Nether Chili, Vegetable Pizza, Builder's Lunch
Rice	Ingredient only	Rice crop	Seafood Rice, boss dishes, Mushroom Risotto
Corn	3 / 1.8	Corn crop	Cornbread, Farmer's Lunch, Nether Chili
Pepper	2 / 1.2	Pepper crop	Spiced Steak, Tropical Skewer, chili
Butter	Ingredient only	Milk bucket → two butter at the Cooking Station; returns the bucket	Garlic bread, baked potatoes, pastries

The six ordinary crops grow on farmland through eight ages, using normal light, hydration and bone-meal rules. Mature crops yield produce and seeds; Fortune increases the extra-seed roll. Farmers can plant and harvest them, chickens accept the seeds, and produce and seeds can be composted. Farmers may offer four seeds for two emeralds through their randomized novice trade pool.

Frost Garlic, Jungle Pepper and Marsh Rice add three regional crops. Ordinary garlic, pepper or rice has a 25% mutation chance at the final natural growth step in its matching frozen, jungle or swamp region. Bone meal does not trigger mutation. Once obtained, regional seeds can grow on suitable farmland elsewhere; regional produce converts back to its ordinary ingredient.

Cookbook discoveries and feasts

Craft the Cookbook from a book and Wild Herbs. It lists categorized recipes, ingredients, effects, collected meals and hints for locked dishes. Right-click recipe scrolls to learn them permanently; duplicate scrolls are preserved.

Discovery	Current sources
Shadow Stew	Ancient City and mineshaft chest loot.
Infernal Roast	Bastion treasure chest loot.
Captain's Chowder	Shipwreck supplies, fishing treasure and higher-level Chef trades.
Frost Garlic Soup	Igloo chest loot.

Discovery	Current sources
Jungle Pepper Skewer	Jungle temple chest loot.
Marsh Rice Bowl	Dungeon chest loot.
Bog Gumbo	Journeyman Chef.
Hero Feast	Chef scroll or collecting twenty distinct Darkspawn meals.

Loot-table scroll additions use a 50% roll when the applicable loot is generated. Existing opened inventories are not rewritten. A Cooking Station can serve as a Chef workstation for an unemployed adult villager. Chefs use five native trade levels, stock and restocking; they cannot take another player's station inputs.

Hunter's, Woodland, Ocean, Nether and Hero Feasts, plus Ender Banquet, each provide six servings. Place a feast and empty-hand right-click while hungry. A serving gives eight hunger points and a five-minute effect. Untouched feasts can be recovered; breaking a partly eaten feast loses the remaining servings.

Meal effects and variety

Meal identity	Benefit
Hearty Sustenance	20% less food exhaustion
Hunter's Instinct	+10% movement speed; hostile attackers glow for three seconds after hurting you
Surefooted	+30% knockback resistance and 35% less fall damage
Iron Stomach	Halves the duration of newly applied, finite poison effects
Deep Breath	Air drains half as often underwater
Energized	+10% movement speed; 20% less exhaustion while sprinting
Miner's Focus	+20% block-breaking speed
Fisher's Luck	+1 Luck, affecting luck-sensitive fishing loot
Warming	Prevents freezing damage and clears frozen ticks
Spiced Protection / Lightfoot	Fire resistance / slow falling, owned by the meal

The recent-food window remembers eight eating events, including vanilla foods. Three distinct foods add 5% bonus saturation, five add 10%, and eight also heal half a heart every five seconds while at full hunger. Repeated food still gives normal nutrition. Recent variety resets on death; learned recipes and lifetime meal collection persist.

The appendix lists all 59 current Cooking Station outputs and ingredients. Each boss premium dish uses its own boss ingredient with rice, butter and Wild Herbs. Decorative trophies are separate placeable rewards, not ingredients consumed by the meal.

Armor and climate

Standard armor styles

Iron and diamond keep their vanilla item identities and core protection. Fifteen styles replace their appearance and grant a bonus when all four worn pieces share a style. Iron and diamond may mix. Inactive loadouts and incomplete or mixed-style sets grant no style bonus.

Style	Full-set bonus
Classic	20% less worn armor durability loss, before Unbreaking; randomized fractional rounding.
Knight	+2 armor toughness.
War Chief	+1 native melee attack damage.
Berserker	+10% native attack speed.
Samurai	+10% sword damage.
Spartan	+10% spear damage.
Viking	+10% axe damage.
Ranger	+10% bow and crossbow damage, including crossbow rockets; matching set required at impact.
Reaver	+10% mace damage, including smash attacks.
Pirate	+10% melee and thrown trident damage; matching set required at impact.
Pathfinder	+5% movement speed.
Conquistador	+10% pickaxe mining speed after native modifiers; no harvest-tier upgrade.
Juggernaut	+15 percentage points knockback resistance, subject to the native cap.
Paladin	+10% healing received through normal healing; maximum health stays unchanged.
Shadowblade	2 seconds of invisibility after taking damage; 15-second cooldown. Shadowblade armor, trims, and glint also disappear while invisible.

Apply a style at a smithing table with paper, an iron or diamond piece, and the style addition. Styling preserves names, enchantments, damage, trims and boss powers. Applying the current style wastes nothing. Restore Classic with an iron nugget. Retired Arbalist, Royal Guard and Brawler data loads as Ranger, Paladin and Berserker.

Appearance	Addition
Viking	Bone
Spartan	Feather
War Chief	Gold ingot
Knight	Iron ingot
Berserker	Rabbit hide
Samurai	Bamboo

Appearance	Addition
Paladin	Amethyst shard
Juggernaut	Obsidian
Pathfinder	String
Reaver	Flint
Pirate	Nautilus shell
Conquistador	Copper ingot
Ranger	Leather
Shadowblade	Ink sac
Restore Classic	Iron nugget

Standard armor asset preview, showing the later Ranger, Paladin and Shadowblade designs. Equipment is shown in front and rear views.

Legendary armor

Five four-piece legendary families upgrade netherite armor and keep its base protection and repair rules. Each piece requires a netherite upgrade template and a core crafted from two specified boss essences plus a netherite ingot. A full set requires four cores and templates. Only a complete worn matching set grants its legendary power.

Set	Essences needed for each core	Full-set ability
Dragonlord	Ice Wyrm + Netherborn	+25% direct melee/projectile damage against bosses or mobs with at least 40 maximum health. Does not boost PvP or indirect retaliation.
Phoenix	Thunder Bird + Netherborn	Survive a fatal hit at 1 heart with Regeneration II for 5 seconds; 10-minute cooldown. Bypass-invulnerability damage such as the void remains fatal.
Voidwalker	Void Eye + Shadow Creeper Queen	No ender pearl teleportation damage; 40% less remaining fall damage.
Titan	Mountain Titan + Fossil Tyrant	+2 hearts maximum health and +40 percentage points knockback resistance, on top of netherite. Equipping does not heal; removing clamps excess health.
Soul Reaper	Soulbound Colossus + Baba Yaga	Restore 1 heart on a player-credited hostile enemy kill; 5-second cooldown. Passive animals and players do not qualify.

Phoenix and Soul Reaper cooldowns persist through equipment swaps, reconnects, restarts and respawns, using world ticks. Phoenix does not protect against the void or grant lasting invulnerability. Legendary smithing preserves item data, and standard paper-style recipes cannot convert legendary pieces.

Legendary armor asset preview. Front and rear pairs: Dragonlord and Phoenix, Voidwalker and Titan, then Soul Reaper.

Expedition equipment

Five expedition families convert matching iron armor using leather in the template slot and a family-specific addition. Worn pieces supply benefits; stored sets do not. Families can mix, but full-suit effects require their stated pieces. Helmets, pouches, tanks and canteens are modeled details; they do not add cargo, refill tanks or dynamic light systems.

Set	Defense: helmet / chest / legs / boots	Current benefits
Mountaineering	2 / 6 / 5 / 2	Full four-piece set prevents vanilla powder-snow freezing. Boots let you walk on powder snow, with native crouch-to-descend behavior.
Spelunking	2 / 5 / 4 / 1	Helmet grants personal night vision while equipped. Boots reduce remaining fall damage by 25%, multiplying with existing meal and boss modifiers.
Diver	2 / 6 / 5 / 2	Helmet grants +2 native oxygen bonus (roughly triples average air duration before other modifiers), 2.5x submerged mining speed, and night vision while underwater. Air is finite; normal swimming controls remain unchanged.
Desert Wanderer	2 / 5 / 4 / 1	Each worn piece provides 20 heat protection (80 for the full suit).
Ashwalker	2 / 6 / 5 / 2	Each worn piece reduces incoming fire-tagged damage by 10%, up to 40%, before native armor/enchantment mitigation. Lava still damages you; no fire-resistance effect is granted.

Output	Addition
Any Mountaineering piece	Any wool block
Spelunking Helmet	Glowstone dust
Spelunking Chestplate or Leggings	Copper ingot
Spelunking Boots	Slime ball
Any Diver piece	Prismarine shard
Any Desert Wanderer piece	Rabbit hide
Any Ashwalker piece	Magma cream

Expedition armor asset preview. Front and rear pairs: Mountaineering and Spelunking, Diver and Desert Wanderer, then Ashwalker.

Temperature and preparation

Survival and Adventure players track heat and cold exposure, shown by a HUD meter with direction and wetness. Biome, exposed altitude, night, rain, water, cover and nearby heat sources affect conditions. This is a gameplay exposure scale, not degrees Celsius. Creative and Spectator are exempt.

Exposure changes once per second: one point toward worsening conditions or two points toward recovery. At 35 points the HUD warns; at 60, movement slows by 10% and mining by 15%; at 85, climate damage is one health point every five seconds. Shelter and appropriate equipment gradually improve exposure rather than instantly clearing it.

Mountaineering protects against cold; Desert Wanderer and Ashwalker protect against heat; Diver adds cold protection while wet. Warmth and Cooling I-II add protection on worn armor and are mutually exclusive on one piece. Warming meals help against cold, and Fire Resistance helps against heat without granting complete climate immunity. Deep cover moderates Overworld climate, while Nether heat persists under cover.

Exposure and wetness save across reconnects and living dimension travel; offline exposure pauses, and death starts comfortable. There is no thirst system. Spelunking night vision is personal vision, not emitted world light or mob-spawn suppression.

Inventory and storage

Personal capacity and sorting

Press R during gameplay or use Sort inventory in the Survival inventory. Sorting merges compatible stacks and orders the main inventory plus extra rows by item ID. It preserves hotbar, armor, offhand and crafting slots. Cursor-held items, stale menu state and unsupported containers prevent unsafe requests.

Upgrade	Crafting ingredients	Total main slots
Leather	4 leather, 4 string, 1 chest	36
Iron	8 iron ingots, 1 leather	45
Diamond	4 diamonds, 1 iron ingot	54

Apply leather, iron and diamond upgrades in order by holding and using them. Each adds nine slots, reaching 54 main slots plus the separate nine-slot hotbar. Capacity is permanent per player; stored items follow normal death and keepInventory rules. Extra rows can receive overflow pickups and provide recipe-book ingredients.

Armor loadouts

Upgrade	Crafting ingredients	Result
Iron Armor Loadout Upgrade	1 armor stand, 2 leather, 2 iron ingots	Unlock armor set 2
Diamond Armor Loadout Upgrade	1 armor stand, 2 leather, 2 diamonds	Unlock armor set 3

Iron unlocks set two and diamond unlocks set three. The inventory shows the active, locked or switching state. To populate a set, switch to it and equip the normal armor slots. Inactive sets grant no stats and use no main-inventory space.

Switching takes two seconds while grounded with the inventory open. Damage, movement into the air, item use, inventory changes, dimension travel or disconnects cancel it. Riding, gliding, cursor-held items, recent damage and Curse of Binding can prevent a switch. Saved items keep all their data. Inactive armor follows normal death drops, vanishing and keepInventory rules.

Directed storage routes

Build a route from Dump Chest through Sorting Tubes and Sorting Chests to a terminal Bank Chest. Gold arrows indicate output direction. Empty-hand use rotates tubes; sneak-use rotates chests. Filters record item types without consuming the sample.

Block	Purpose	Crafting ingredients
Dump Chest	27-slot network input; Deposit moves main inventory and unlocked extra rows, preserving hotbar, armor, and offhand	Iron ingot above chest above hopper
Sorting Chest	27 storage slots plus three ghost item filters; accepts matching routed items, merging compatible stacks before using empty slots	Iron ingots above/below chest; redstone on either side

Block	Purpose	Crafting ingredients
Bank Chest	Searchable overflow storage with separate recoverable Trash, quantity display, paging, and capacity upgrades	Iron ingots in corners; diamond top; ender pearls left/right; chest center; obsidian bottom
Sorting Tube ×8	Sends items toward the next block along its gold arrow	Iron nuggets across top/bottom; glass, redstone, glass across middle

A Dump attempts up to 64 items from one slot every five ticks, rotating slots to avoid starvation. Matching Sorting Chests receive what fits, then remaining items continue to later chests and the Bank. Routing checks at most 128 loaded blocks, detects cycles and never force-loads chunks. Unaccepted items stay at their source.

Sorting Chests have 27 real slots and three ghost filters. Empty filters accept no automatic stock; manual deposits remain unrestricted. Hoppers can access Dump and Sorting Chests, with filter enforcement on insertion. Banks use their menus and tubes instead of direct hopper access.

Bank storage and recovery

Banks start at 256 distinct item variants with up to 1,000,000 items per variant. Named, damaged or enchanted variants remain separate. Upgrades costing one, two and four diamond blocks raise capacity to 512, 1,024 and 2,048 variants. Banks and shulker boxes cannot be nested inside banks; bank items cannot enter bundles or shulker boxes.

Search by item name or ID, sort by name or count, page results, withdraw one item or a stack, and bulk-deposit eligible inventory. Re-sort sends stored stock back toward eligible Sorting Chests. The separate Trash view is recoverable until Empty trash is confirmed with a second click within five seconds. Manual deposits never automatically enter Trash.

Breaking a Bank preserves its inventory, filters, Trash and upgrades in one Bank item. Dump and Sorting Chests drop their contents normally. Dropped banks can be lost like any other dropped valuable item; pick them up promptly.

Bonfires and exploration structures

Barracks Bonfire

Craft the bonfire from two iron ingots, two copper ingots, a campfire and three stone bricks. Place it over the center full copper block of a three-by-three foundation, with stone bricks in the other eight positions. Full copper blocks support wax and oxidation variants; cut copper is not valid.

Empty-hand right-click toggles power. Sneak-use cycles horizontal radius through 25, 50 and 75 blocks. Coverage extends ten blocks below and twenty layers above the core. Blue flames mean activation is still clearing hostiles or placing initial lights; orange means active. No fuel is consumed.

The ward blocks ordinary hostile spawning and entry, including spawners, eggs and raids inside its area. Entire collision boxes are checked. Existing hostiles are moved to safe loaded ground outside all wards; if relocation cannot succeed, they are paused and activation remains blue. Bosses, Withers and Ender Dragons are exceptions. Projectiles and explosions from outside are not blanket-blocked.

The prototype places replaceable light sources on a sparse grid, providing real block light without replacing solid blocks or water. Walls still block light and dark pockets can remain. Core and foundation must be loaded; the ward never force-loads chunks. Breaking or disabling it removes its own unneeded lights when those chunks tick, while overlapping wards retain shared lights.

Boss discovery landmarks

Overgrown Druid Shrines generate in forests and Abandoned Hunter Camps in taigas. Each has three variants and four rotations, a ritual clue book and modest finite loot. Shrine footprints are 31 by 31 blocks; camps are 25 by 25. Candidate placement uses 40-chunk spacing and 16-chunk separation, with terrain rejection, so this is not a guaranteed travel distance.

All sites can be explored before defeating the dragon. They do not grant hearts, premium boss ingredients or complete summons. Boss rituals still require progression and valid conditions. These structures appear only in newly generated terrain; existing explored chunks and opened inventories are not rewritten. All fourteen additional boss families now have regional sites with three variants each. The catalog below lists their native structure IDs.

Region	Landmark ID	Boss
Plains and meadows	farm_excavation	Mutant Zombie
Desert and badlands	fossil_altar	Fossil Tyrant
Savanna	storm_altar	Thunder Bird
Jungle	serpent_sanctuary	Titan Boa
Swamp	witch_hut	Baba Yaga
Mountain habitats	quarry_shrine	Mountain Titan
Frozen lands	frozen_nest	Ice Wyrm
Open oceans	expedition_wreck	Kraken
Cave biomes	webbed_outpost	Cave Crawler
Deep Dark	deep_dark_hive	Shadow Creeper Queen
Mushroom fields	fungal_court	Mycelial Sovereign

Region	Landmark ID	Boss
Netherborn biomes	ember_shrine	Netherborn
Soul Sand Valley	soul_reliquary	Soulbound Colossus
Outer End islands	end_observatory	Void Eye

New regional sites occupy 25 by 25 blocks. Surface and End sites require supported gentle terrain; cavern sites require natural boss headroom, a retained roof and an opening into the cavern. Wrecks require deep open water over a supported seabed. The Kraken ritual still takes place at the surface. Native exclusion zones separate farm excavation candidates from villages and hive candidates from Ancient Cities. Conservative terrain checks can make sites scarce, particularly in Mushroom Fields.

Research bunkers

Research bunkers generate in new Overworld terrain and introduce Forsaken access. Their Quarantine Protocol book and research archive explain gate construction and fabrication. Each visitor can learn the schematic permanently; an archive is not consumed by the first player.

OneBlock and Forsaken

Shared OneBlock island

Use the OneBlock button in the inventory to enter the shared island for free. Inside, Return goes back. Travel takes three seconds standing still on solid ground; damage cancels it and adds a combat delay. Dismount and detach carried or leashed pets first, close other containers and clear the cursor and crafting grid.

Shared phase	Breaks to unlock the next phase	Main additions
Grassland	100	Dirt, grass, oak wood; basic supplies and farm animals
Stone	200	Stone, coal, iron, copper, gravel; lava for a cobblestone generator
Farmland	250	Sand, clay, moss; crop and sugar-cane supplies
Deep Caves	350	Redstone, lapis, gold, diamonds; zombie encounters
Nether	450	Netherrack, quartz, soul sand, glowstone; brewing supplies and zombified piglins
End	Endless	End stone and mixed advanced resources; pearls, obsidian, and Endermen

Everyone shares one persistent island and phase. The resource at 0, 79, 0 regenerates above a protected bedrock anchor. Its represented vanilla block controls mining speed, harvest requirements, drops and experience. Counts are per phase. Meeting a threshold unlocks manual Next phase rather than forcing the group onward.

A supply chest is attempted every 25 successful breaks and a vanilla creature every 50, only when safe supported space is available. Earlier essentials remain in later pools. Creative breaking does not advance phases. No custom Darkspawn boss events or distant islands are included.

Possessions are separate: inventory, hotbar, equipment, extra rows, stored armor and Ender Chest contents switch to saved OneBlock versions and back on return. Character upgrades, XP, health, hunger and effects remain shared. There are no normal item imports or exports. Death respawns on the island and follows keepInventory; void losses are real, while outside possessions remain saved.

Forsaken city expeditions

Learn the bunker schematic, repair the five-by-five obsidian gate frame with a three-by-three opening, and fabricate a reusable Containment Key. After world dragon victory, use the key on the controller to activate the gate. Empty-hand use enters. Researched players can fabricate personal gate parts, and everyone can use an already opened gate.

The landing has an Extraction Terminal that returns each traveler near their own entrance. Equipment and salvage travel normally; Forsaken does not use OneBlock item separation. Gates have no fuel timer, but a damaged frame must be repaired and reactivated. Normal death and keepInventory rules apply.

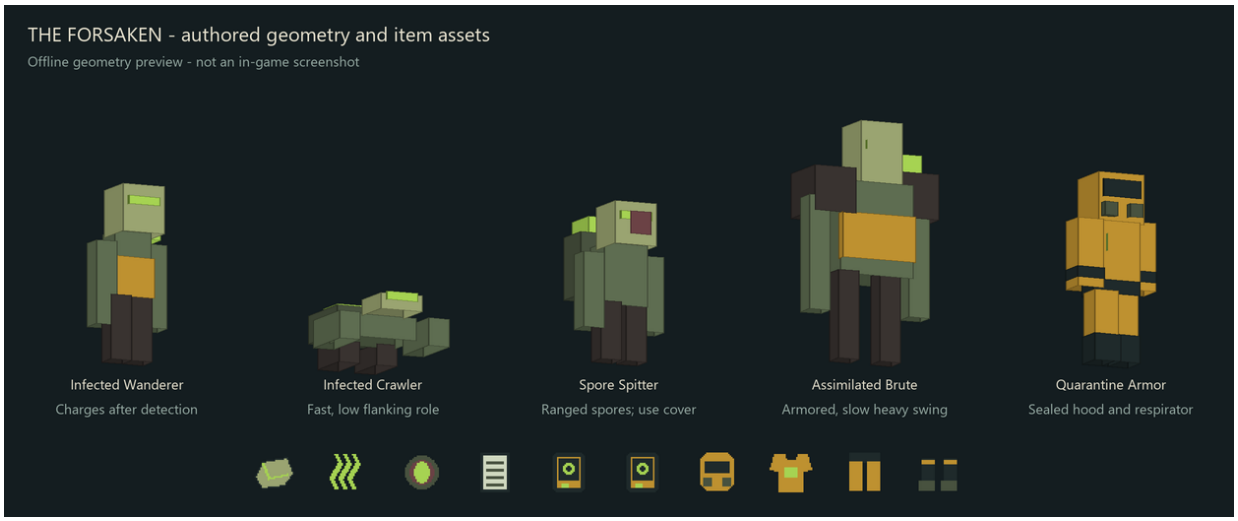

The first city slice lies south of the landing. Apartments and shops lead through quarantine boundaries to a hospital and research annex. Ten finite scavenging caches support ground, upper-floor, rooftop and tunnel exploration. A rooftop crossing offers another route, and the main retreat street remains clear. Cities repeat every 512 blocks along both axes in fresh terrain.

Four infected roles now threaten the city: Wanderers charge, Crawlers flank, Spore Spitters attack from range and retreat when crowded, and slow armored Brutes appear under high pressure. Their attack windups give time to move

away or take cover. Four permanent nests occupy the hospital and annex in new cities. Destroying a nest yields one Parasitic Core and suppresses unrelated city spawns for five minutes; other intact nests remain active.

Contamination slows movement by 15% for at most 60 seconds, refreshed by later exposure. Honey, milk, successful extraction or death clears it. Each worn Quarantine Armor piece shortens new exposure by 15 seconds; a full set prevents new contamination. It does not cure an existing effect. The suit has iron-tier defense, a sealed hood, respirator filters and a rear scrubber.

Combat, explosions and breaking blocks raise one shared pressure value per city. Quiet time reduces it. Pressure is capped at 100, with warnings at 25, extra activity at 50 and a short surge at 75. A surge lasts at most 30 seconds with two minutes between starts. Spawning is limited to 12 nearby infected per city, 64 loaded infected across Forsaken and eight total spawn attempts per second. Peaceful and disabled mob spawning are respected.

Forsaken enemies and quarantine equipment. Authored geometry preview, not an in-game screenshot.

Forsaken resources and equipment

Resource	Where to find it	Implemented purpose
Contaminated Alloy	Salvage caches, 1 to 3 guaranteed	Modules, scanner and beacons
Biofiber	Player-killed infected; medical caches	Modules and armor smithing
Parasitic Core	One per destroyed nest	Modules, scanner, blade and beacon fuel
Research Data	Annex and rooftop caches, 1 to 3	Modules, scanner and beacons
Quarantine Module	20% extra roll in medical, research and roof caches; craftable	Armor and blade upgrades; beacons

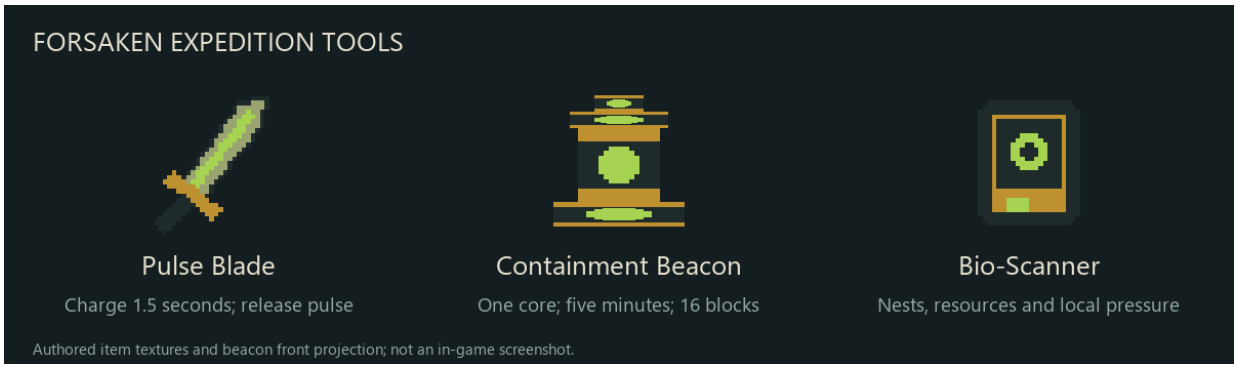

Craft a Quarantine Module with 4 Biofiber, 2 Alloy, 2 Research Data and 1 Core. At a smithing table, use a module as the template, an iron armor piece as the base and Biofiber as the addition. This preserves the gear's existing damage, name, enchantments and other native components. Repeat for helmet, chestplate, leggings and boots.

Craft the Bio-Scanner from 1 Alloy, 2 Research Data, 1 Core and 1 Redstone. Use it in Forsaken to scan loaded terrain within 32 blocks. Sneak-use cycles nests, resources and caches, and local infestation; all modes share a five-second cooldown.

Existing cities and opened caches are preserved. Find a fresh city for nests; unopened caches use updated loot. City pressure survives restarts. Unloaded nests do not accumulate spawn waves.

Forsaken expedition tools

These tools extend the city expedition loop with infected control, a temporary refuge from new spawns and information for scavenging. Existing enemies can still enter a beacon area.

Authored textures and beacon front projection, not a gameplay screenshot.

Pulse Blade

At a smithing table, combine a Quarantine Module template, an iron sword and a Parasitic Core. The upgrade preserves names, enchantments and damage. Ordinary melee deals 25 percent extra damage to infected. Hold Use for 1.5 seconds, then release a four-block pulse: 10 damage to visible, non-allied infected, an eight-second cooldown and eight durability per pulse. Early release is free. Players, pets and blocks are unaffected by the pulse. Charge sparks, a ready chime and a visible ring mark its timing.

Containment Beacon

Craft one device from 4 Alloy, 2 Modules, 2 Redstone and 1 Research Data. Place it in Forsaken and use one Core to power it for five minutes. It suppresses new managed infected spawns within a three-dimensional 16-block radius. Overlapping devices do not stack or kill existing enemies. Use an empty hand to check remaining time. Active top-ups are refused; breaking it returns the device and loses the remaining fuel. Fuel deadlines survive saves, and expiry follows server world time.

Scanner modes

Sneak-use cycles Nests, Resources and caches, and Local infestation. Nests reports the closest intact nest; Resources reports the closest dropped exclusive material or unopened Forsaken cache. Cache signals never open containers or generate loot. Local infestation reports the current city pressure, district and remaining surge time. Scans stay in loaded terrain, share a five-second cooldown, and cannot reveal distant unloaded cities.

Darkspawn Journal

Open the free Journal button in your inventory or expanded Creative storage screen. It brings creatures, mounts, bosses, cooking, Forsaken and landmark discoveries into one searchable reference. The world keeps running while you read. Use Refresh after exploring to update the server snapshot.

Journal portraits before and after discovery, derived from the existing creature models.

Discovery belongs to the player

Observe a living creature within 24 blocks with a clear line of sight, or enter a native landmark, to discover it. Checks run every two seconds. Undiscovered species show silhouettes and habitat hints; known entries reveal names, behavior, rewards and controls. Discovery survives death, reconnects and OneBlock item-profile changes. Spectators do not gain observations. Previously visited landmarks must be revisited if no record exists.

Existing progress carries over

Cooking entries read current Cooking Station recipes and your existing cookbook discoveries. Consumed boss hearts and Minecraft credited-kill statistics are separate: receiving a heart never invents a kill. Historical shared participation cannot be reconstructed. Visiting a boss landmark reveals its ritual clues. Existing Forsaken research unlocks expedition guidance; infected portraits unlock through observation or a credited kill.

Browse and search

Choose Guide, Wildlife, Mounts, Bosses, Cooking, Forsaken or Sites. Search filters the displayed information in that section. The left arrows page through entries; Previous and Next page through long descriptions. Section counters show known and total entries. The catalog covers 82 regional creatures, 14 mounts, 16 bosses, four infected and 17 landmark families, plus guidance and current cooking recipes.

This first pass is an English field reference with static model illustrations. It never opens caches, loads distant terrain, awards rewards or moves possessions. Discovery coordinates, maps, structure compasses and archaeology remain future exploration work. Actual GUI scaling, narration and multiplayer readability remain live acceptance checks.

Presentation and prototype boundaries

The creature pipeline contains 115 regional and boss GeckoLib assets plus four Forsaken infected rigs, separate from the 14 Java-rendered mount types. Editable Blockbench sources, textures and runtime models accompany the content. Mounts now have species-specific materials and animation, and the Nyan-inspired cat emits a six-color rear trail when ridden.

Regional creatures have native-state-driven animations and custom sound work. Boss encounters have phase-based music, with volume reduced during attack warnings. Some impacts, utility icons and effects still use vanilla assets. The mod does not include the Nyan Cat song.

Cooking labels truncate with full-name tooltips when necessary. Temperature text wraps to fit the viewport. Armor inventory textures and trim borders are registered on the same atlas. These presentation changes do not change equipment recipes or damage rules.

Explicitly unfinished or planned

Area	Not currently implemented
Mount combat	Autonomous combat behavior and further species abilities.
Transport concepts	Magic carpet, cloud, airplane and mech systems.
Forsaken	Procedural city expansion and long-expedition balance review.
World exploration	Expanded archaeology, discovery maps, rematches and Nexus concepts. All sixteen boss landmark families are implemented; live terrain and rarity acceptance remains.
Character systems	Proficiency and skill-gated crafting; thirst.
OneBlock	Extra islands, custom boss events and normal export/import of outside items.
Equipment details	Diver tank refill, boot anchoring and storage inside modeled expedition pouches.

The implementations above are present in development source. Alpha balancing, final animation and camera fit, encounter frequency and multiplayer behavior can still change. This guide is not a claim that every feature has completed live acceptance testing.

Source record

Prepared from the current Darkspawn registrations and implementations, the player README, mount and bonfire notes, OneBlock and Forsaken implementations, armor catalogs, localized names and Cooking Station recipe resources. Source snapshots and document generation are dated October 13 2026. The release version is unchanged; no new playable JAR is implied by this guide.

Cooking Station recipe catalog

Every ingredient below costs one item per craft. Alternatives separated by “or” satisfy one ingredient slot, not multiple slots. Recipe discoveries still apply. The current catalog has 59 recipe outputs; the Cookbook shows recipe-specific effect details in-game.

Output	Ingredients	Discovery requirement
Ancient Sap Pudding	Ancient Sap + Rice + Butter + Wild Herbs	Available
Beef Wellington	Cooked Beef + Wheat + Red Mushroom or Brown Mushroom	Available
Berry Pie	Sweet Berries + Wheat + Sugar + Egg	Available
Bog Gumbo	Cooked Cod + Brown Mushroom + Onion + Wild Herbs	Journeyman Chef
Builders Lunch	Bread + Cooked Mutton + Cheese + Tomato	Available
Butter x2	Milk Bucket	Available
Captains Chowder	Cooked Cod + Rice + Butter + Salt	Shipwreck supply chests
Cavern Stew	Cave Truffle + Rice + Butter + Wild Herbs	Available
Cheese	Milk Bucket + Salt	Available
Cheesy Potato	Baked Potato + Cheese + Butter	Available
Chicken Cordon Bleu	Cooked Chicken + Wheat + Cheese	Available
Chocolate Cake	Cocoa Beans + Milk Bucket + Wheat + Sugar	Available
Chorus Pie	Chorus Fruit + Wheat + Sugar	Available
Cornbread	Corn + Wheat + Butter	Available
Ender Banquet	Void Delight + Chorus Pie + Ender Salad + Butter	Available
Ender Salad	Chorus Fruit + Corn + Tomato + Wild Herbs	Available
Explorers Meal	Cooked Rabbit + Rice + Pepper + Garlic	Available
Farmers Lunch	Corn + Carrot + Bread + Cheese	Available
Farmhouse Roast	Cooked Beef + Carrot + Potato + Wheat	Available
Fish Chowder	Cooked Cod or Cooked Salmon + Milk Bucket + Potato + Bowl	Available
Fishermans Stew	Cooked Cod + Tomato + Wild Herbs + Bowl	Available
Frost Garlic Soup	Frost Garlic + Potato + Butter + Bowl	Igloo chests
Garlic Bread	Bread + Garlic + Butter	Available
Herb Steak	Cooked Beef + Dandelion	Available
Hero Feast	Prime Hunters Roast + Kraken Platter + Sovereign Risotto + Void Delight	Eat 20 distinct meals, or trade with a master Chef
Honey Pork	Cooked Porkchop + Honey Bottle	Available
Honey Tart	Honey Bottle + Wheat + Egg	Available

Output	Ingredients	Discovery requirement
Hot Wyrm Stew	Wyrm Fat + Rice + Butter + Wild Herbs	Available
Hunters Feast	Prime Hunters Roast + Hunters Stew + Bread + Cheese	Available
Hunters Stew	Cooked Rabbit + Potato + Sweet Berries + Onion	Available
Infernal Roast	Infernal Marrow + Rice + Butter + Wild Herbs	Bastion treasure chests
Jungle Pepper Skewer	Jungle Pepper + Cooked Chicken + Corn	Jungle temple chests
Kraken Platter	Kraken Meat + Rice + Butter + Wild Herbs	Available
Marsh Rice Bowl	Marsh Rice + Brown Mushroom + Onion	Dungeon chests
Miners Meal	Cooked Mutton + Potato + Bread + Brown Mushroom	Available
Mountain Bisque	Mineral Salt + Rice + Butter + Wild Herbs	Available
Mushroom Risotto	Rice + Red Mushroom + Butter + Garlic	Available
Nether Chili	Cooked Porkchop + Pepper + Tomato + Corn	Available
Nether Feast	Infernal Roast + Nether Chili + Spiced Steak + Pepper	Available
Night Watch Stew	Brown Mushroom + Golden Carrot + Onion + Bowl	Available
Ocean Feast	Kraken Platter + Seafood Rice + Fish Chowder + Salt	Available
Prime Hunters Roast	Prime Beast Meat + Rice + Butter + Wild Herbs	Available
Restorative Broth	Restored Marrow + Rice + Butter + Wild Herbs	Available
Salt	Water Bucket	Available
Seafood Rice	Cooked Salmon + Rice + Onion + Salt	Available
Shadow Stew	Royal Jelly + Rice + Butter + Wild Herbs	Ancient City chests
Soul Broth	Soul Salt + Rice + Butter + Wild Herbs	Available
Sovereign Risotto	Sovereign Cap + Rice + Butter + Wild Herbs	Available
Spiced Steak	Cooked Beef + Pepper + Garlic + Salt	Available
Storm Omelette	Charged Yolk + Rice + Butter + Wild Herbs	Available
Titan Curry	Titan Meat + Rice + Butter + Wild Herbs	Available
Tropical Skewer	Cooked Chicken + Melon Slice + Cocoa Beans + Pepper	Available
Tyrants Stock	Marrow Extract + Rice + Butter + Wild Herbs	Available
Vegetable Pizza	Wheat + Tomato + Cheese + Onion	Available
Void Delight	Void Essence + Rice + Butter + Wild Herbs	Available
Winter Hotpot	Cooked Porkchop + Potato + Garlic + Butter	Available
Witchs Gumbo	Witch Spice + Rice + Butter + Wild Herbs	Available
Woodland Feast	Woodland Stew + Ancient Sap Pudding + Garlic Bread + Cornbread	Available
Woodland Stew	Red Mushroom or Brown Mushroom + Carrot + Wild Herbs + Bowl	Available
